

RECORDING

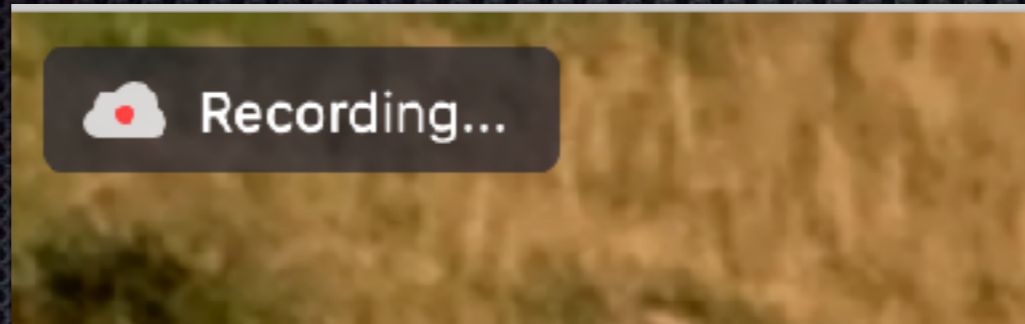

For Learning Opportunities

WHY?

- ✦ For students that can not attend synchronous lessons
- ✦ For key parts of lessons for students to review later
- ✦ Flipped classroom
- ✦ Demonstrations, etc.
- ✦ Assessment purposes

How?

- Spend time learning the tools you want to use - Zoom, Google Meet Enterprise, Screencastify..
- You can also use phones or external cameras for demonstrations
- If you record knowing where the recording goes and how to share the recording. This depends on the tool being used.
- Editing recordings
- Practice
- Recorded presentation https://nzotlc.zoom.us/rec/share/59FnFpXh2DtLfUzUKFcaAvLqfCaaa81nUeq_MMzkdPW8NEPnTb-btJ6LXYuAbo
- Access Password: j1!\$V7Mj

ZOOM recording features

- Basic license recordings go onto the device in an MP4 format. This can then be uploaded to asynchronous space e.g. Google Classroom
- Pro license recordings can go to the cloud which generates a link that can be shared. Storage is limited unless you have an enterprise subscription
- Meetings can be set to record automatically
- Recordings can be paused and restarted
- Recordings can be trimmed if needed
- External cameras can be used as well as phones

Issues to consider when recording

- ✦ How will the recording be used?
- ✦ Who can access the recording?
- ✦ Have you let participants know you are recording?
